MICHAEL SOLOMON

Liverpool, UK | Linkedin.com/in/adus-michael | Adusmichael@gmail.com

PROFESSIONAL SUMMARY

Health Business Analyst with a strong combination of healthcare business analysis, clinical operations, data analytics, and mental health service experience. Skilled in gathering and documenting business requirements, developing BRDs and PRDs, conducting process mapping and gap analysis, managing stakeholders, and leading User Acceptance Testing (UAT) for healthcare systems and digital transformation initiatives. Proficient in SQL, Excel, Power BI, Confluence, Lucidchart, and Visio, with experience analysing healthcare data, developing KPI dashboards, and translating operational and clinical information into actionable insights. Brings extensive frontline experience within NHS and mental health environments, providing a strong understanding of patient pathways, clinical workflows, multidisciplinary collaboration, data governance, and service improvement

CORE SKILLS

Stakeholder Management & Communication |Gap Analysis | Stakeholder Engagement | Stakeholder Relationship Management | Workshop Facilitation | Cross-Functional Collaboration | Requirements Gathering Sessions | Stakeholder Communication | Change Impact Assessment | Meeting Facilitation | Executive Reporting | Data Analysis & Reporting | Data Analysis | Data Interpretation | KPI Monitoring | Dashboard Development | Business Intelligence Reporting | Data Visualization | Data Validation & Quality Assurance | Root Cause Analysis | Performance Reporting

TECHNICAL SKILLS

BRD, PRD, Functional Requirements, User Stories, Acceptance Criteria, UAT, RACI Matrix, Microsoft Visio, Lucidchart, Excel, Power Bi, SQL, JIRA, Azure DevOps, Confluence

PROFESSIONAL EXPERIENCE

Health Business Analyst | Amdari Inc

United Kingdom | May 2026 to Present

- Collaborated with healthcare stakeholders, clinical teams, and operational departments to gather, analyze, and document business requirements in BRDs and PRDs using Confluence, improving requirement clarity and reducing project rework by 30%.
- Utilized Excel, SQL, and Power BI to analyze healthcare and operational datasets, develop performance reports, and generate actionable insights that supported evidence-based decision-making across multidisciplinary stakeholder groups.
- Designed and maintained interactive Power BI dashboards to monitor healthcare KPIs, service delivery metrics, patient outcomes, resource utilization, and project performance, improving visibility and reducing reporting preparation time by 35%.
- Developed and maintained RACI matrices and stakeholder engagement plans to ensure clear accountability, effective governance, and successful execution of healthcare transformation projects.
- Conducted business process mapping, workflow analysis, and gap assessments using Lucidchart and Visio to identify inefficiencies, streamline healthcare operations, and improve service delivery effectiveness.
- Led User Acceptance Testing (UAT) activities for healthcare systems and digital transformation projects, creating test scenarios, managing defects, and validating solutions to ensure compliance with business and clinical requirements.

Senior MH STR Support Worker | Core 24 Psychiatric Liaison Team, Warrington General Hospital

Warrington, UK | Jun 2024 to Present

- Recorded accurate, timely clinical information in line with NHS documentation standards, supporting data integrity for reporting and audit
- Analyzed patient pathways and coordinated follow-up care, using documented observations to inform clinical decision-making and reduce delays in discharge
- Led data-informed interventions and therapeutic engagement strategies that contributed to a 30% reduction in average hospital stays
- Collaborated with clinicians, ward teams, and external agencies to streamline referral-to-discharge workflows and support continuity of care

- Contributed to service improvement initiatives, documenting process changes and outcomes to support ongoing performance measurement

Healthcare Worker | Elysium Healthcare - Arbury Court

Liverpool, UK | May 2023 to May 2024

- Maintained and recorded structured clinical observations and care notes to inform care planning and management reporting
- Supported therapeutic routines while monitoring physical and mental health indicators, escalating risks and ensuring data capture for audits
- Communicated observations and handovers to multidisciplinary teams to improve accuracy of patient records and care continuity
- Ensured compliance with clinical governance and safeguarding protocols, supporting quality and data governance requirements

EDUCATION

Data Science and Business Analytics | University of Texas at Austin

Nov 2022

CERTIFICATIONS

- Healthcare Business Analysis Lifecycle
- Healthcare Systems and Digital Health Technology
- Requirements Engineering for Healthcare Systems
